

Auto Link

OBD2DMI Interface

DMI Installation Break-Thru

A Replacement for Transmission Sensors currently used with DMI's

Connects Instantly To All Vehicles Built Since 1996

INSTALLS IN 30 SECONDS - Save the time, Save the hassle

- No Tools Required
- No Cable Splicing
- No Separate Power Cable Runs
- No Waterproofing Problems
- No Installation Costs
- No Sensor Module Adjustments

Interfaces directly between the OBD Port and the DMI

The Auto Link is a Microprocessor Controlled Interface that quickly links your Vehicle Speed Signal (VSS) to a DMI. By simply plugging the Auto Link between the On Board Diagnostic connector (OBD) found in all recent vehicles and a Distance Measuring Instrument (DMI) you are ready to begin normal DMI operations.
